Comfortable: React | Firebase | Express.js | Responsive web design | Git version control

Familiar: Node.js | MongoDB | JWT | Stripe

Tools: VS Code | Figma | Netlify | Vercel | GitHub

Projects

Lingua Camp (A language learning website)

June 2023-Present

[Live Link](#) | [Github](#) > [Client](#) | [Server](#)

- Instructors can create language classes, set prices, specify available seats and submit them for admin approval. Once approved, the classes are displayed on the website for students to enroll.
- The website includes a secure payment gateway that allows students to make payments for the classes they enroll in. This ensures a convenient and seamless payment process.
- The admin has the authority to review and approve the classes created by instructors and the ability to change the roles of users on the website.

Technologies Used: React | Tailwind CSS | DaisyUI | Node.js | Express.js | MongoDB | Firebase | JWT | Stripe | Vercel

Superhero Toy Store (A superhero toys website)

May 2023-Present

[Live Link](#) | [Github](#) > [Client](#) | [Server](#)

- Users can browse and shop for superhero toys by category from the homepage, ensuring quick and convenient access to their preferred toy types.
- To access complete details of a specific toy, users are required to log in, ensuring a secure and personalized viewing experience.
- The website features an "All Toys" page where users can explore a comprehensive collection of superhero toys added by other users providing a broad range of options to discover and choose from.

Technologies Used: React | Tailwind CSS | DaisyUI | Node.js | Express.js | MongoDB | Firebase | Vercel

Chef Hut (A chinese chefs and recipes website)

May 2023-Present

[Live Link](#) | [Github](#) > [Client](#) | [Server](#)

- The website showcases profiles of popular Chinese chefs along with their respective popularity, measured by the number of likes they have received. Users can explore the profiles of these renowned chefs and learn more about their culinary expertise.
- To view recipes on the website, users are required to log in. This feature ensures a personalized experience and allows the website to provide tailored recipe recommendations based on user preferences and interests.
- The home page of Chef Hut highlights special foods created by master chefs. These featured dishes provide a glimpse into the culinary creations of top Chinese chefs, enticing users and showcasing the expertise of these culinary masters.

Technologies Used: React | Bootstrap | Node.js | Express.js | Firebase | Vercel

Education

BSc in Electrical and Computer Engineering | 2022-Present | Rajshahi University of Engineering and Technology
